- 2 Main Brackets
- 2 Bagwell Brackets
- 2 Hardware Packs

Bagwell Bracket   Bagwell Bracket

Left Main Bracket   Right Main Bracket

1

Take off factory brackets and basket from golf cart by removing hardware from each side. Retain hardware. You will need it later.

REMOVE HARDWARE

REMOVE HARDWARE

2

Take the seat back off the cart by removing the two back screws located on each side. Retain hardware. You will need it later.

3

Set the rear struts on the frame. There should be nothing attached to the rear of the golf cart as shown in the picture.
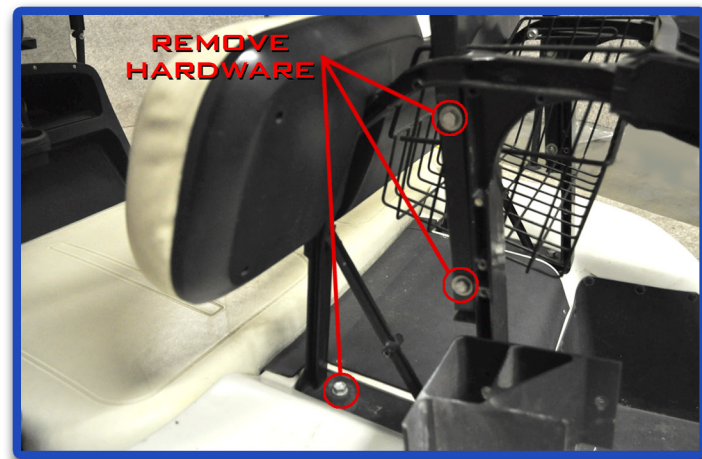

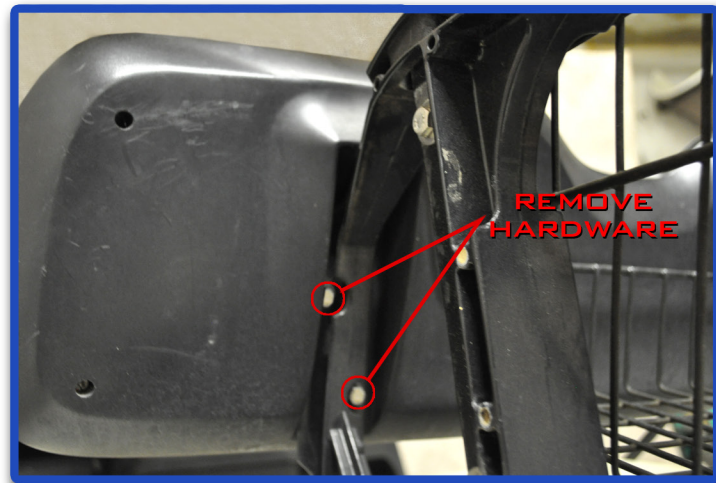

ATTACH HARDWARE

4

Attach main bracket to each side of the golf cart using hardware from pack 1.

ATTACH HARDWARE

5

Attach bagwell brackets to the floor of the bagwell using hardware from pack 2. Attach bagwell bracket to main bracket using hardware from pack 2.

6

Attach rear struts to main bracket on each side using retained hardware from step 1.

ATTACH HARDWARE

REATTACH

7 Reattach seatback using hardware from step 2.

8 Place the cargo box on the main brackets and align holes. Using remaining hardware from pack 2, insert all bolts into box and then tighten.
